IRON WOODS®

VANISH DECKING SYSTEM

THE OUTDOOR HARDWOOD FLOOR

VANISH DECKING SYSTEM

Timber Holdings Intl., makers of Iron Woods®, the leading brand of premium hardwood decking for over 25 years, is excited to introduce the ultimate luxury in outdoor surfaces – Vanish Decking System.

The Vanish Decking System lets you bring the refined, uniform aesthetic of interior hardwood flooring to your exterior spaces. After all, you wouldn't allow gapped boards with visible plastic clips in your home. Now you will never again have to settle for them in your outdoor living spaces. With this innovative new product from Timber Holdings, the boundaries between interior and exterior vanish once and for all.

The perfect complement to the natural beauty of Iron Woods hardwood decking, Vanish brings a newfound level of sophisticated elegance to terraces, pool decks, gardens, walkways, open-air kitchens and outdoor living areas.

Traditional edge groove and clip systems have a number of performance and aesthetic drawbacks. Typical plastic clips don't offer the necessary strength and durability to withstand temperature extremes, UV exposure or the forces applied by durable hardwoods such as IPE. These fasteners tend to bend, move, fade or crack, allowing the decking to become misaligned and unstable. Other so-called "hidden fasteners" are not much better, since they are not really hidden at all. Invariably, the railroad track of unsightly fasteners is visible through the reveals in the deck slats and detracts from the uniform beauty of the decking. With Iron Woods' invisible system, the fasteners actually vanish.

- Vanish Decking System fasteners are made from coated stainless steel, and are up to 3 times stronger than traditional plastic clips. In addition, they prevent rusting to further extend the life of your deck.
- Vanish Decking System fasteners are designed to allow for contraction and expansion while keeping the decking in alignment. This ensures unparalleled strength, stability and beauty.
- The Vanish Decking System utilizes a proprietary clip-eclipsing wood profile that completely conceals the fastener system while still allowing water to drain. This profile also makes certain that small objects such as earrings or coins will not fall through the decking.

With no gaps or screws to detract from the rich, natural beauty of Iron Woods hardwood or to possibly cause unwanted cracks and splinters, it's clear that no decking solution available on the market today is more appealing to the eye or gentler on bare feet than the Vanish Decking System.

Vanish truly is the Outdoor Hardwood Floor.
